log-Fourier, up to 6 harmonics
(protocol ensemble, 400)
two-level and sinusoid
(protocol ensemble, 16)
log-Fourier, up to 12 harmonics
(extended, 80)
sinusoid
(extended, 4)
two-level switching
(extended, 40)

1.0
saturation $\eta = \mu T / (\mathrm{TV}_T[\ln \varepsilon]/4)$, largest value over the k grid
largest saturation in the class
bound, $\eta = 1$
harmonic efficiency $\pi/4$
